## St. Boniface

Greater Winnipeg Water District The GWWD was incorporated in 1913 and in 1914 it was authorized to construct a railway or tramway from Winnipeg to the eastern boundary of Manitoba. A railway was constructed from St. Boniface to Waugh on Shoal Lake. This was intended for use in connection with the construction work on the water supply system and for patrol purposes only thereafter. During the construction period the GWWD began to operate a freight and passenger service along the route.
